The Aerospace Industry Association of British Columbia is a member-funded alliance of

BC-based companies working together to promote and develop one of the fastest growing high-tech industries in Canada.

AIABC was originally constituted as a committee of the BC Aviation Council, which has been serving the interests of aircraft and airport operators in the province for more than half a century. When member companies who are involved in the manufacture, development, repair, maintenance and overhaul of aircraft and engines voiced a need for greater representation, AIABC was born and in 1994, evolved into a separate organization. AIABC now acts as an umbrella organization, serving the needs of aerospace-related manufacturing, repair and overhaul companies in the province. Click on AIABC's logo to learn more.

Pacific Northwest Defense Coalition (PNDC), an association of companies in the defense and security industries, fosters steady economic growth for the region and sustainable long-term profits for its members. Activities and services are developed to serve members' business needs in the two most important ways: decrease costs and increase revenues. Whether your firm is a traditional government contractor, a subcontractor, or is making its first foray into government partnerships, PNDC can help. By providing training and education on issues ranging from contracting basics to complex regulatory issues, PNDC ensures that members are running efficient and compliant operations. Business-to-business networking gives members the opportunity to meet other innovative businesses, share best practices and important lessons learned, and seek out beneficial partnerships. PNDC also acts as an important conduit for a wide variety of defense-related information, including a monthly newsletter on member activities, industry trends, and upcoming events. PNDC serves as an intermediary between members and the defense industry in the US and abroad. Whether you're a member looking for a partner or new supplier, or a major defense contractor looking for a hard-to-find product or service, PNDC can make the right connections. Click on PNDC's logo to learn more.

The Supplier Excellence Alliance is comprised of aerospace, defense, and space primes/OEMs, major subcontractors, and suppliers working together to accelerate supply chain performance. SEA is prime-empowered and supplier-led. Click on SEA's logo to learn more.
