Press Release: Expansion of GrovTec Machining's Oregon Production Facility

[Portland, Oregon – 6/7/2024] – GrovTec Machining, a leading production machining facility, is thrilled to announce a significant expansion in both capacity and expertise. We have recently acquired over a dozen pieces of equipment and welcomed ten highly skilled workers from a prominent local machine shop that recently closed. This strategic move underscores our commitment to delivering exceptional service and high-quality products to our customers.

In an industry where precision, efficiency, and expertise are paramount, the addition of these machines and additional team members represents a substantial enhancement of our capabilities. The new equipment includes multiple Tornos screw machines, Hydromats and an ABC Index, allowing for greater automation, higher precision, and increased production speeds. These enhancements will enable us to meet the growing demands of our customers and offer more versatile machining solutions.

The ten skilled workers joining our team bring with them years of experience and a wealth of knowledge. Their expertise spans various aspects of production machining, from programming and operating advanced machinery to implementing quality control measures and optimizing production workflows. We are confident that their skills will integrate seamlessly with our current team, fostering an environment of innovation and excellence.

“We are excited and blessed to have this opportunity to expand our operations,” said Bob Grover, Founder of GrovTec US, Inc. “The acquisition of these machines and the addition of such skilled workers will significantly enhance our production capabilities. This growth not only allows us to support our existing customers with greater efficiency and quality but also gives us the ability to take on new projects requiring even higher production volumes. We are committed to providing precision parts and reliable machining solutions, and this expansion is a testament to that.”

GrovTec Machining would like to extend heartfelt thanks to our loyal customers, dedicated employees, and supportive community. Without your continued trust and support, this exciting growth would not have been possible. We look forward to serving you with these expanded capabilities and continuing to exceed your expectations.

For more information about our services and how we can assist with your production machining needs, please visit our website at www.grovtecmachining.com or contact us at info@grovtecmachining.com.

About: GrovTec Machining is a premier production machining facility specializing in high-volume, precision machining services. With a commitment to quality, innovation, and customer satisfaction, we provide comprehensive machining solutions to a diverse range of industries. Our state-of-the-art equipment and skilled workforce ensure that we deliver exceptional products and services every time.
